Education

Imperial College London — London, UK
MSci Physics with Theoretical Physics — *Sep. 2025 – Jun. 2029*

- First-year average: 75.6% – First-Class equivalent.
- Relevant modules: Statistics of Measurement, Practical Physics: Laboratory, Computing and Problem Solving.
- Developed quantitative reasoning through computational project, laboratory data analysis and problem-solving in Real Analysis, achieving 93% and 78% in Statistics and Mathematical Analysis exams respectively.

St Wilfrid's Catholic Comprehensive School — Crawley, UK
A-Levels — *Sep. 2023 – Jun. 2025*

- Mathematics (A*), Physics (A*) and Chemistry (A).

Experience

Axioms – Quantitative Finance and Risk Programme — Jan. 2026 – Mar. 2026
Imperial Mathematics Society — *London, UK*

- Completed a nine-week quantitative finance programme focused on Python, machine learning, trading strategy research and risk management.
- Developed an understanding of how probability, expected value and market pricing are used to assess fair value and potential mispricing.
- Evaluated strategy risk using backtesting, position sizing, drawdown analysis and risk-adjusted metrics including Sharpe, Sortino and Calmar ratios.

CAE — Jul. 2024
Engineering Work Experience Placement — *Crawley, UK*

- Shadowed professionals across engineering and business departments, gaining insight into technical operations and team management.
- Gained exposure to how technical work is controlled through procedures, safety checks and accuracy standards to reduce errors.

Projects

Short-Term ETF Return Reversal Research | *Python, Pandas, NumPy, Matplotlib* — In progress

- Building a Python backtest to test whether extreme daily returns across highly liquid US equity ETFs predict next-day reversals.
- Incorporating transaction-cost sensitivity, out-of-sample testing and risk metrics including Sharpe ratio and maximum drawdown.
- Assessing robustness across ETFs, periods and signal thresholds while controlling for look-ahead bias.

Personal Linux Home Server | *Linux, Docker, Networking*

- Configured and maintained a self-hosted Linux server for network-attached file storage and self-hosted photo management via immich, deploying containerised services with Docker.

Skills & Activities

Technical Skills: Python, NumPy, Pandas, Matplotlib, Git, Linux, Docker and LaTeX
Activities & Interests: Imperial Algorithmic Trading Society, basketball and music production
